

A walkable public acceptance line

Three hubs, two wings, evidence maturity and the 100 m failure theatre

CONCEPT ONLY | official geometry + controls pending

EVIDENCE LADDER

- E3 official task / standards
- E2 public repository data
- E1 recalculable concept
- E0 field / statutory pending

FIRST 100 M: FAILURE THEATRE

- A DAILY AI optional; analogue path open
- B CONTEST explain, refuse, human takeover
- C FAILURE stop, bypass, onsite help
- D REPLAY public receipt + minority view

Five layers for an existing-city corridor

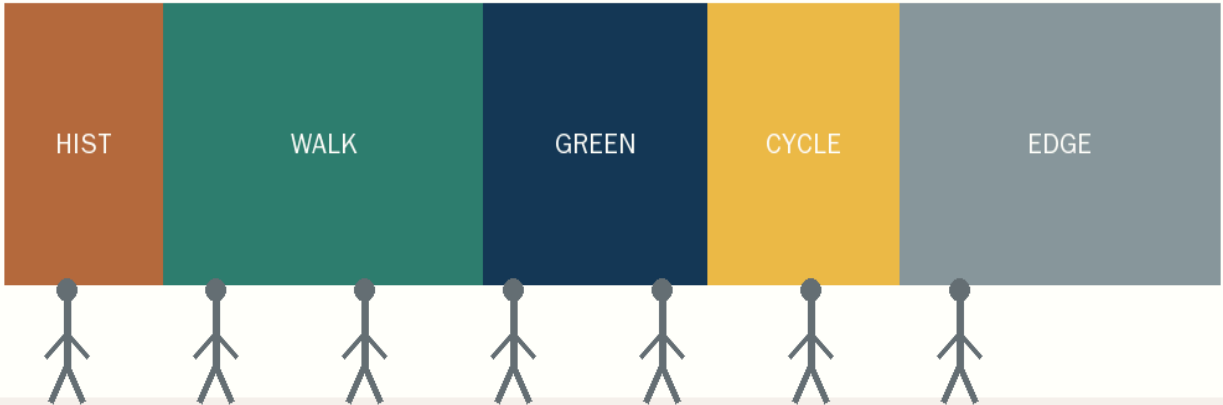

Every dimension awaits survey; every AI point retains value after withdrawal

CONCEPT ONLY | official geometry + controls pending

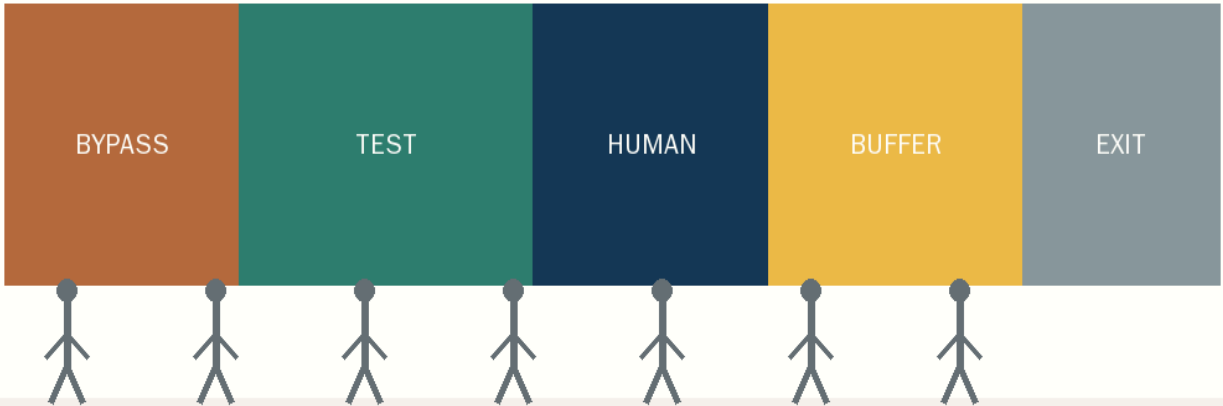

FIVE PUBLIC-INFRASTRUCTURE LAYERS

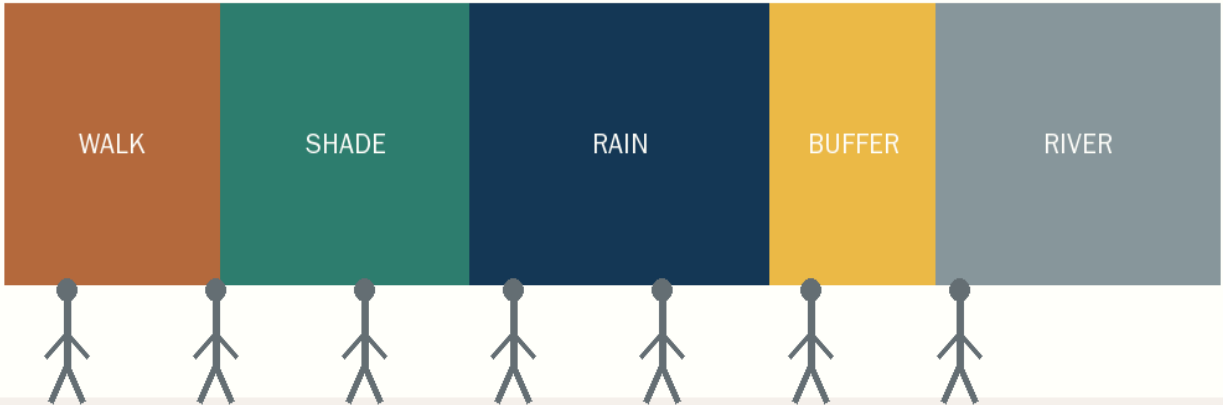

S1 STATION FRONT: DAILY FIRST

S2 UNDERCROFT: CONTROLLED TEST

S3 RIVER EDGE: ECOLOGY FIRST

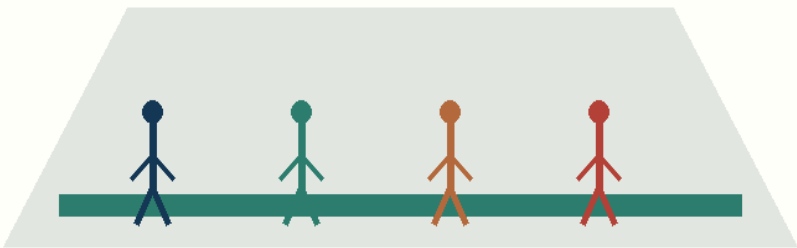

KEEP · REPAIR · ADD · STOP — four reversible decisions

Three everyday tasks that can actually be accepted

One analogue–AI–human–receipt protocol, translated into three distinct places

PROOF GARDEN

full-stack safety station

A small team submits an agent
Synthetic suite before bounded public trial

一次任务 / ONE TASK

SUBMIT

RED-TEAM

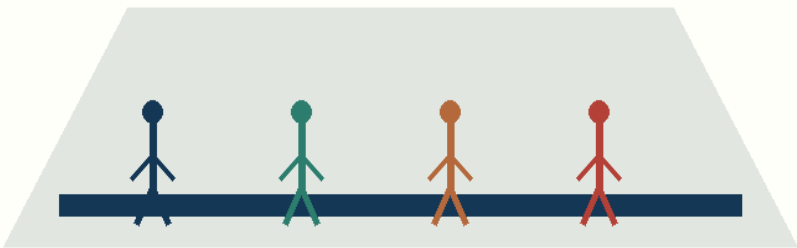

RECEIPT

GATE + DELIVERABLE

- ▮ No public contact before G2
- ▮ Severe deception = stop
- ▮ Output: versioned scorecard

ORIGIN COMMUNITY

accessible co-test + transfer

A wheelchair user reports a break
Analogue repair remains; AI only assists

一次任务 / ONE TASK

WALK

HUMAN DESK

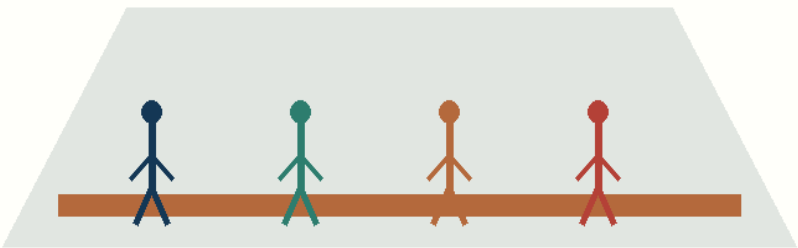

CLOSE ISSUE

GATE + DELIVERABLE

- ▮ Worst-group outcome first
- ▮ 48h open item → human
- ▮ Output: closure evidence

DABELL

experience + consumer rights

A visitor compares AI and human help
Price, reason and exit shown together

一次任务 / ONE TASK

CHOOSE

CONTEST

RESTORE

GATE + DELIVERABLE

- ▮ No dark patterns
- ▮ Withdrawal enables deletion
- ▮ Output: remedy receipt

Continuity, shade and stormwater before sensing

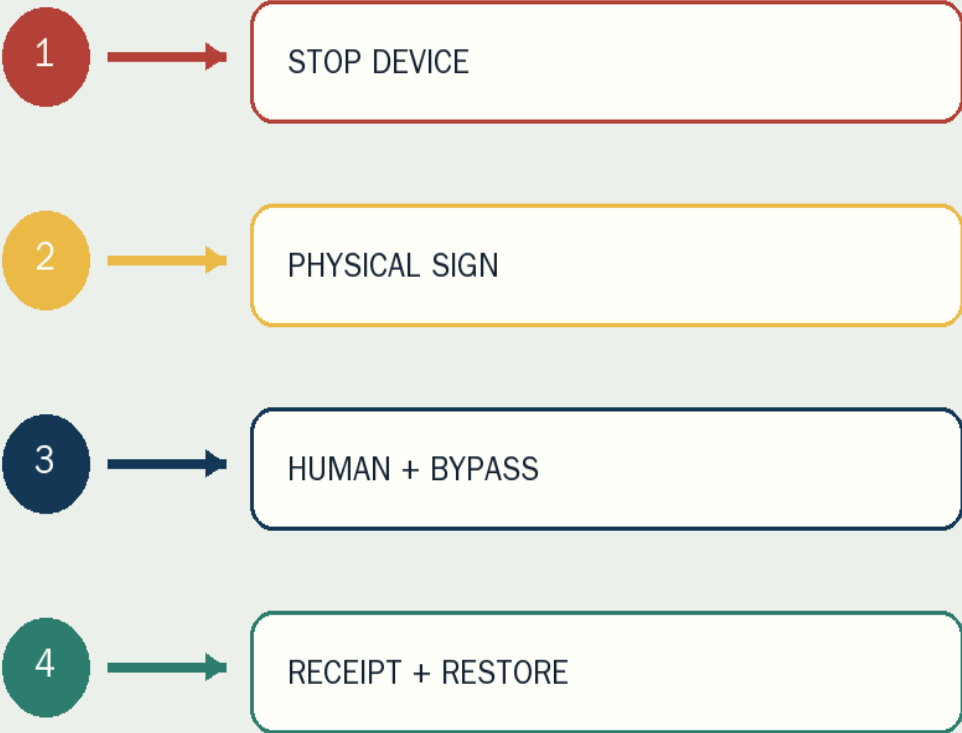

Test routes never consume the ordinary path; safe degradation works onsite

2 LONGITUDINAL + 6 CROSS LINKS

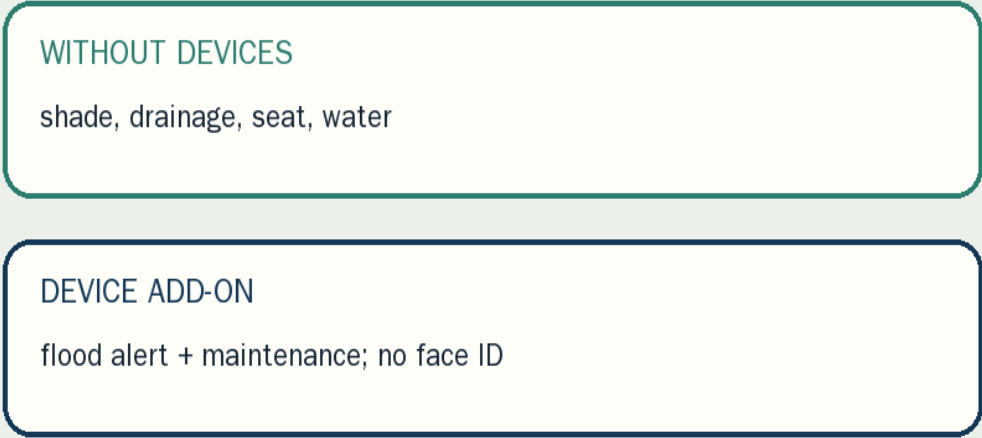

RED LINE: test closure ≠ park closure; AI withdrawal ≠ service withdrawal

ONSITE DEGRADATION / 4 STEPS

DUAL ACCEPTANCE

Deployment is not success: evidence decides scale, repair or exit

Every run leaves a receipt; worst group, near-miss and appeal outrank averages

BASELINE

TRIAL

RECEIPT

PUBLIC REVIEW

扩展 SCALE

返修 REPAIR

退出 EXIT

PUBLIC-VALUE EVIDENCE ON ONE SCREEN

ACCESSIBLE CHAIN

closure + unresolved at 48h

WORST GROUP

gap, never hidden by average

SAFETY NEAR-MISS

per 1k runs + severity

HUMAN TAKEOVER

reach, response, recovery

DATA MINIMUM

fields, retention, deletion proof

PUBLIC SPACE

ordinary-path uptime

RUN RECEIPT: 7 ANSWERS

1

谁负责 / accountable human

2

哪一版本 / model + prompt

3

什么证据 / source + baseline

4

谁可拒绝 / consent + analogue

5

何时接管 / trigger + SLA

6

如何申诉 / remedy owner

7

何时删除/退出 / expiry + restore

With weak evidence, “do not scale” is a valid success.
